

# Tuatha De Danann, Bella Natura

Shining rays, the sun is gliding over all these fields we live and wear out  
To eat, drink and to use up all of you know, but when I ask you why dont you preserve it  
Is not infinite the wonderful place which all we live  
It's better if all of us start to think what we can do to the Earth

So come on my friends  
Let's look to this world!!!  
Learning with our old mistakes...  
Bella Natura...

Lets work - lets work  
Right now - Right now  
Time marches against us  
Take care - Take care  
Together - together  
We all try to fix these nebulous things we did a long time ago

So come on my friends  
Let's look to this world!!!  
Learning with our old mistakes...  
Bella Natura...

And when our chance is over  
We'll not have another place to go  
Why don't take care and love this  
Green vastness and the whole world  
Well become perfect partner  
look out! may be it turns against us

Shining rays , the sun is gliding over all these fields we live and wear out  
To eat, drink and to use up all of you know, but when I ask you why dont you preserve it  
Is not infinite the wonderful place which all we live  
It's better if all of us start to think what we can do to the Earth

So come on my friends  
Let's look to this world!!!  
Learning with our old mistakes...  
Bella Natura...
