

Tune, Drive

Farewell my only friend
I'm running out the door
Holding the car keys in my hand
I'm gonna leave this poison land
Where I'm insecure like a sinking sand

Feel like I'm born again
For the first time in my life I feel no pain
Blood is boiling in my veins
Gotta drive away
Gotta break the chain

Farewell my only friend
I can take no more
It's getting harder to pretend
I'm gonna leave this promise land
Where I'm on the floor going round the bend

Feel like I'm born again
For the first time in my life I feel no shame
Blood is burning in my veins
Gotta drive away
Gotta break the chain and escape

Accelerate and escape x8

Gotta drive away
Gotta break the chain
and escape

Accelerate and escape x16
