U.D.O., Living On A Frontline

Bad days are coming Back into my head They're looking for trouble, is that alright You know you've seen them before

And now they're turning Into the deepest nights Shadows on the wall - don't surrender at all You're not alone this time

Do or die - you'll always be on the run Like a soldier in time - rain or shine Aces high - you'd better be on the ball Don't move outta the way - stand for what you've gotta say

We're living on a frontline Always trying not to go We're living on a frontline It's much more than enough this time We're living on a frontline

Now you start searching
For a better life
Better not look back - go straight ahead
Just be yourself all the time

Do or die - you'll always be on the run Like a soldier in time - rain or shine Aces high - you'd better be on the ball Don't move outta the way - stand for what you've gotta say

We're living on a frontline Always trying not to go We're living on a frontline It's much more than enough this time

We're living - living on a frontline Always trying not to go We're living on a frontline It's much - it's much too much this time Go ahead this time Ah, we're living on a frontline

Ah, it's a bad game I've told you before So stay away from the frontline And your friends next door

You say you're lonely But i don't want them no more But one day - you're gonna see They're gonna disappear

We're living on a frontline Always trying not to go We're living on a frontline It's much more than enough this time

We're living - living on the frontline Always trying not to go We're living on a frontline It's much - it's much too much this time

On a frontline
