

# Underoath, You're So Intricate

Like I said

Leave your baggage at the back door

I'm leaving you the way I think it should be

We're always pulling into spaces that we can't back out of

Starting fights we can't talk our way out of them

How does it feel to be on the receiving end of this one?

This now will flow with us this now work with us

this is our last surviving chance I wanna survive 2x s

feast your eyes (work with us), I don't care

I'll fantasize of being manic

And leaving us behind

In your eyes you were the one that tried

Acceptance is what holds us here

And you my dear are the one I fear tonight

We'll try just one more time

This is the moment that we all live for

Are you ready? Are you ready?

This now will flow with us this now work with us

this is our last surviving chance I wanna survive 2x s

feast your eyes (work with us), I don't care I don't care I don't care  
and I'll never care

I can't see past your waving hand

just running away again

I can't see past your waving hand

just running away again

You think so loud it hurts my ears

I wanna know how to get through this, how to get

through this without choking up

I can't feel you you're too far from me!
