

Usher, One Day You'll Be Mine

Check it out
Come on
I'm sayin'
You gon' be mine
First time I saw you baby
You did something to me
That no else has ever done
Ah baby - Something in your eyes
Caught me by surprise
And told me that you were the one
Ah baby- And what's bad is I know you get on man
But he'll never understand
The chemistry between me and you - Ah baby
Something inside of me
It's saying you and I were meant to be
If you can think it you can have it
That's why I believe
(Hook)
One day you'll be mine (mine)
No more creepin', sleepin' around
No whispering when he's around
Now every time I see you baby
It's plain to see
That I'm everything you've been missin at
Home Ohhh
So much love to share
It's something in the air
Tellin' me I should never leave you alone
And even through
I know you gotta man
He'll never understand
The chemistry between me and you - Ah baby
You can try to stop it but it won't quit
You say you don't when you know that you want it
I know, one day well be mine
(Hook)
