

Vacant Stare, Seeds Of Unrest

I'm at the point of no return
I am always on the run
This has always been a sign
To get a little bit of save me
Get away from me

Wait and see what you get
Wait and see what you get
Wait and see what you get
Wait and see what you get

Trust not fear should come before that
Look and see what you've got

Trust not fear should come before that
Look and see what you've got

Will you take to save your fate
This is all we've got lose

Beyond the point of where I've gone
Greater men have reached the sun
This is not without its price
So to get a little bit of save me
Get away from me

Wait and see what you get
Wait and see what you get
Wait and see what you get
Wait and see what you get

Trust not fear should come before that
Look and see what you've got

Trust not fear should come before that
Look and see what you've got

Will you take to save your fate
This is all we've got lose

Now
Before you wake

I want to use you and then abuse you
And then we're playing round and round and?

Trust not fear should come before that
Look and see what you've got

Trust not fear should come before that
Look and see what you've got

Will you take to save your fate
This is all we've got loose

Will you take to save your fate

Will you take to save your fate

Will you take to save your fate
This is all we've got lose

LOSE
