## Van Morrison, This Weight

This weight is weighing on my heart This weight is tearing us apart This weight is weighing on my soul And it just won't leave me alone

You know I'm talking about this weight You know I'm talking about this weight

In the neighboorhood people watching me Got to move to protect my sanity Anonymity is all I want you see You may think it's mediocrity, but

You know I'm talking about this weight You know I'm talking ahout this weight

And this Hollywood ain't no good I would rather be like Robin Hood If I could only loose this...

You know I'm talking about this weight You know I'm talking about this weight

And this Hollywood ain't no good I would rather be like Robin Hood If I could only loose this...

You know I'm talking about this weight You know I'm talking about this weight

In the very first it was rock and roll Set me free in body and soul But this weight is just bringing me down It's never satisfied every time I go to town You know I'm talking about this weight....
