Vanessa Paradis, The Future Song

Life brings on unexpected changes But we must carry on despite it Are we gonna try Are we gonna make it Why is love so very hard Why is peace so very far I can't make it The future of our space and time Is not gonna wither and die The future of our space and time Is not gonna say goodbye We can't control all our situations And we can't console unprivileged Nations So why don't we try To make more smiling faces We're so full of disregard We feel pain within our hearts I can't take it The future of our space and time Is not gonna wither and die The future of our space and time Is not gonna say goodbye So I'm calling out Out to all the races We can't gain control Without communication And we need to learn for future generations There is future in our stars There is beauty that is ours We're gonna make it The future of our space and time Is not gonna wither and die The future of our space and time Is not gonna say goodbye
