

# Various, Maybe

(Disney song)

Now we shoot whatever we see  
Night or day in color photography  
Candid shots are barrels of fun  
Takin pictures by the light of the sun  
Smile, hon, look at the camera  
Hold your breath and say cheese  
And with every single shot we take, we are making memories  
Making memories, making memories  
Taking pictures is making memories  
Catching little pieces of time  
Making them yours, making them mine  
Great vacations and celebrations  
Can fade away in a year  
But when we're making memories  
Happy days are always here  
All around us  
Everywhere we look  
Every moment that we live  
Can fill a picture book  
Light and shadows  
Smiles and sentimental tears  
They're a precious treasure  
We can cherish through the years  
Making memories, making memories  
Taking pictures is making memories  
Catching little pieces of time  
Making them yours, making them mine  
Great vacations and celebrations  
Can fade away in a year  
Cause when we're making memories  
Happy days are always here  
Happy days are always here
