

Venera, The Dragon Bites

It's coming down from above the clouds
Bared fangs and howling aloud
It's a carnivore kill the lights
The dragon bites

Yeah, finally unleashed
The black beast came from the east
It's the last time the sky is bright
The dragon bites

Stand up and unite until tomorrow
Now it's time to fight
By hatchet, halberd or by arrow
Against the dragon's bite
Make it fly home
Stand up and unite until tomorrow
Or it may never come
