Vera Vuitton, Did Ya Understand That

Sometimes I wish that I could be the person that you are
Just for a minute
Long enough that I can break your heart
Can you even comprehend
Did you even understand a single word that I said

I wonder why you do the things that boy you do to me
I cant imagine why you treated me so horribly
Are you listing to me
Are you trying to ignore me
Do I stutter when I speak

What you gonna do baby what you gonna say
I'm cutting you loose cause I've got no time for you
Who you gonna run to
Who you gonna blame
as a matter of fact I wont look back

I don't want you
I don't need you
Let me tell you where its at
Im through with you
Can you understand that
I don't want you
I don't love you
Hit the road jack
Im through with you
Did you understand that

Sometimes I wish that you could be the person that I am
So you can feel inside exactly what im feeling (yeah)
Maybe then you'd understand
How to treat a lady, how to be real man
You cant imagine what I think of when I think of you
I see a sucker not the person that I though I knew
Will you ever comprehend
Maybe you can keep it going but I cant pretend

What you gonna do baby what you gonna say
I'm cutting you loose cause I've got no time for you
Who you gonna run to
Who you gonna blame
as a matter of fact I wont look back

I don't want you
I don't need you
Let me tell you where its at
Im through with you
Can you understand that
I don't want you
I don't love you
Hit the road jack
Im through with you
Did you understand that

I used to be the only girl that you lived for
You didn't need nothing more
Jaded eyes so im confused when im around you
What is this girl to do

What you gonna do baby what you gonna say
I'm cutting you loose cause I've got no time for you
Who you gonna run to
Who you gonna blame

as a matter of fact I wont look back

I don't want you
I don't need you
Let me tell you where its at
Im through with you
did you understand that
I don't want you
I don't love you
Hit the road jack
Im through with you
Did you understand that (repeat 2x)
