

Vera Vuitton, I Did It For You

We met just by chance
I wrote to you on the internet
And you had the sweetest things to say
You weren't like other guys
They only wanted me for a night
There was something about you that took my breath away

Then you started to talk about
Getting really deep
You want a wife and family
Things that I can't give

Then you wondered why I had to leave
You needed more than just me
And this is why I let go
So you could have your happy home

You can hate me if you wan't to
But just remember this
I did it for you

Coming in and outta my life
It wasn't real, it just wasn't right
You needed something more stable
I'm sitting here a thousand miles away
With nothing left but my famous last name
But I think I can live with it

You expect so much of me
Somedays I wish you could forget about me
Then I couldn't live with myself

You have your dreams and I have mine
Were different people
We don't see through the same eyes

You can hate me if you wan't to
But just remember this
I did it for you

(Repeat)
