

# Vintersorg, Trance Locator

A fiery soul's motion  
Inside a vibration never seen  
Fragments from our existence  
Cosmic instruments released

I travel mathematical events  
The mind's space in centre  
Beams of a star, hides  
The function a spirit swallows

In ecstasy burning  
The universal door  
Every spark sinks into the dark

My visibility, a nebular eruption  
From the night sky's zones,  
The cross worlds profound  
A coronation from flares
