

Violent Delight, Faceless

People always put us down
Don't listen to what we do
We only do what we want
Never take it from you
But what if it works out this time
And we can show you
I hope it works out this time
So I can laugh at you

Why do you want to question
What you'll never do
You don't know what your thinking
So just think it to you
Why can't you just see
What you do to you
Why do you want to question
What you'll never do

But someday you can see us
And I hope you're happy too
You know that you will be right
Just as it pleases you
But what if your wrong
And we can show you
I hope that your wrong
And I'll just laugh at you

You say your better than me
So why hide, why not confront me?
But your scared, so you just hide away
Cos you know you can't be me

You'll never change us
Why can't you see
We'll never listen
We'll be what you don't want us to be

So just step outside
What you think is right
Your just trying to judge, because
We are not your sight
