## Viper, Living For The Night

Living For the Night

Between dusk and day Before the sunrise The city will begin to live its crimes Millions if you ask It happens everywhere Every little corner has its tale Windows are the eyes That witness without soul Watching in the silence what is done I'm a part of this Violence is my friend Walking on the line of life and death Spirits walk the streets Siren sounds alone Screaming out the lyrics of my song I have no other life Concrete is my cage All my desillusions turns to rage

## (Chorus) I'm living for the night Though we have to fear it

Where life is just a game That you have to win Living for the night

When death surrounds you on and on

All the time it's near I'm longing to be free

He even knows my name He wants no waste of time I know that killing is his game And I am the prize Our footsteps sound alone I know he's just behind I feel the panic in our hearts Beating very loud I turn my eyes to him The night is very dark He's got a knife and I know Cause I saw the blade Between the light and shade Between the night and day Between my life and death I only feel the blade

Between dusk and day
Before the sunrise
The city will begin to live its crimes
Millions if you ask
It happens everywhere
Every little corner has its tale
Windows are the eyes
That witness without soul
Watching in the silence what is done

(Chorus)
I'm living for the night
Though we have to fear it
Where life is just a game
That you have to win
Living for the night

When death surrounds you on and on All the time it's near Living for the night Though we have to fear it Where life is just a game That you have to win Living for the night When death surrounds you on and on All the time it's near
