

Visceral Evisceration, At The Epicurean Gynaeco

Pregnant women awaiting their child
Poutinly inspection turns into fell fright
Fresh... arrivals get slashed first
A notorious... doctor slakes his thirst

Osscous remains totally gnawn

Lying... astride he amputates her shanks
Followed... by fingers, arms, legs and hands
With a hammer the baby gets shattered
Reprobating frig it until it is tattered

Excise his blue eyes out of the sockets
To drench them in this bloody mess
Consume omphalic string of the newborn
Eructate shreds of ribald flesh

Veneral organs - smirched with sabulous urine
Ropy rectum - bisecred, blotchy innards inbetween

Abreast with those two torsos
Sated of this beefy meal
Finally slobbering her boony mamilla
Embalm the boob with faccal excreta

Grunes cling on the gynaccological chair
Stench of decay creates mortuary flair

After... the room is cleaned up again
Another... woman awaits her bloodshed
But tables are turned now
To an orgy in blood-red

Elegant she emasculates him
Genital dinner with knife & fork
Ketch-up on the severed scrotums
Salacious scrunch his well-proportioned cock
