

# Voivod, To The Death!

After the battle in the dark  
Side of the desert fields  
Am I the winner fight is over  
And we'll take the place  
Metal burned feel the discord  
For a complete destruction  
Have no mercy come with us  
You're in the meeting  
To the death !  
Tonight we celebrate  
War and our victory  
All possessed by the death  
To take the force by the blood  
Raise your hands for the final slaughter  
High pressure marching like  
A robot from nowhere  
Mutilation we're out to  
Conquer all the planet  
Creeping weapons see the  
Fire blows the sky  
Invasion don't stop the  
Pressure of pain  
Electric power was bursting  
In the air  
Strange fever it seems like  
Your last night  
Total disorder brings  
The final impact  
Come and see what hell looks like  
Many men feel the pain endlessly  
Forever your country needs you  
The world's still waiting to change  
Everybody said the thing's  
Doing so bad  
To the death !  
Is what you say  
To the death !  
Who cares it's the only way  
To the death !  
Is what you need  
To the death !  
Turn to black til they bleed.
