## Westlife, She's Back

Took some time to heal To get my heartbeat back Just when I'm ahead Returning from the dead She's back again...

She knows just what to say She always gets her way Just when I was free She's back inside of me She's back again

## [chorus]

So tell me why the hell I hear music
Every time she calls I hear music
Is it just the way she loves to confuse me
Oh baby
Just when I moved on
Believed that she was gone
She's back again...
She's back again

Like a predator and prey She'll tear my heart away She'll chew me to the bone Leave me rotting here alone 'Til she's back again

## [chorus]

So tell me why the hell I hear music
Every time she calls I hear music
Is it just the way she loves to confuse me
Oh baby
Just when I moved on
Believed that she was gone
She's back again...
She's back again
