

Whistle, Right Next To Me

Goodbye, it's time for me to go
I call you in the morning so I can let you know
The way I really feel, girl, so put your mind in ease
If I don't then who will
If I make it I still want you to be there with me

You say you love and then you'll learn
If you've learned to love me, baby, you'll wait 'til I return
I know it hasn't been easy to love a man like me
Someday, if we try, there will be no goodbye
And we will live happily

'Coz I'll be there one day
And you will be right next to me
'Coz I'll be there one day
And you will be right next to me

Hey there, will you be where I am?
Will you be by my side, girl, or with another man?
Just wait a little longer, girl, I don't know how long
Just try to understand this is not what I've planned
I'm sorry this have to be

Girl, oh Girl every man needs a woman
You're the woman that I choose
And I can't afford to loose you, baby

I swear to the world you'll always be my girl
Just say you'll be right next to me
