

White Town, Once I Flew

Once I flew
And it made my fingertips sing
I was more like a God than a king
Now I can't believe that was true

Once I flew
Though you don't believe me I know
You look where I'm standing now
You can't believe I left the ground

Look up to the bright blue sky
Can't you feel life passing by?
If you could wouldn't you
Try to soar over everything?
All the pain this world can bring
Once I flew now I've lost my wings
Now I'm down here with you
Now I'm down here with you

Once I flew
And the angels were my friends
They would grant my every whim
Now I can't believe that was true
Once I flew
Though it's easy to forget
I don't seem to have managed yet
And I don't think I ever will

Look up to the bright blue sky
Can't you feel life passing by?
If you could wouldn't you
Try to soar over everything?
All the pain this world can bring
Once I flew now I've lost my wings
Now I'm down here with you
Now I'm down here with you

astronauts

And in my dreams I am happy again
You're in my arms and we're flying again
Flying away
