

# X-Wild, Can't tame the wild

Back in the night, looking for a fight  
Whisky's a-burning in my head  
Gotta get some more,  
This night, I gotta get some pain  
You'll get a knife in the back  
an alleyway attack  
Sleeping with the rats another day  
You're barely alive, I see the fear in your eyes  
(Come to me and see the happiness I bring.  
You will not be afraid.)  
Here comes the man - blood on his hands  
Power is rushing in my veins  
Nothing to say, you know you're gonna have to pay  
I am the cat with nine lives, don't be surprised  
Fortune is coming my way  
Just give me the cash and then i'll send you away  
(And you know I lie. Place your body on the knife.  
Come there will be no pain for you or I.)  
You say, we say, I say, you can't tame the wild  
You say, we say, I say, you can't tame the wild  
Back in the night, kickin' for a fight  
Thunder is always in my brain  
Come back for more  
Today I'm giving you the pain  
He got a knife in the back, an alleyway attack  
Sleeping with the rats another day  
He's barely alive, I kiss the fear in his eyes  
(Come and see the glint of the knife. You will be amazed, blood drips)
