## Xandria, Black And Silver

I am amused You seem to love me But be reserved Before you huff me

I'm used to winners I need the fame And if you touch me You'd be my shame

Your childish dreams are all in vain To me your kind is all the same

A starlit sky
Of black and silver is my core
My last goodbye
Makes you want me even more
For silver is my fame
Black is my name

I am a queen And if you creep I'll push my blade Still water deep

I am a dream A fairytale Your endless quest Your holy grail

Thanks so much for your confusion I will be your lost illusion

A starlit sky
Of black and silver is my core
My last goodbye
Makes you want me even more
For silver is my fame
Black is my name

Deep inside
The silver shines as black as can be
My disguise
The wolf among the sheep, you want me
To me your kind is all the same
To me your kind is all the same

A starlit sky
Of black and silver is my core
My last goodbye
Makes you want me even more
For silver is my fame
Black is my name

A starlit sky
Of black and silver is my core
My last goodbye
Makes you want me even more
For silver is my fame
Black is my name
