

# Xandria, Black Flame

Incinerate my skin  
And touch me far far beyond  
Burn me out, my sin  
And take me deeper underground  
I know it's way too late  
When this dance has begun  
So put on the heat  
And let the fire run

Take me away, my black flame

Immaculate you are  
In your tender violence  
And when you touch my heart  
I'll always lower my defense  
Don't let me wait too long  
Cause I don't like to be safe  
We know we can't go wrong  
On our way through time and space

Take me away, my black flame
