

# Xandria, Now and Forever

Millions of songs all these years in my soul  
And when we met I just knew theyre for you  
Now your voice is singing them all  
Your wings at mine we will never fall  
On and on  
We will fly now & forever  
Side to side now & forever my love  
Thousands of miles through the cold stormy air  
Theres really nothing that I wouldnt dare  
I climb the eye of the hurricane  
When the winds are whispering your name  
On and on  
We will fly now & forever  
Side to side now & forever my love
