

Xandria, Now and Forever

Millions of songs all these years in my soul
And when we met I just knew theyre for you
Now your voice is singing them all
Your wings at mine we will never fall
On and on
We will fly now & forever
Side to side now & forever my love
Thousands of miles through the cold stormy air
Theres really nothing that I wouldnt dare
I climb the eye of the hurricane
When the winds are whispering your name
On and on
We will fly now & forever
Side to side now & forever my love
