

# Xandria, Now & Forever

Millions of songs all these years in my soul  
And when we met I just knew they're for you  
Now your voice is singing them all  
Your wings at mine we will never fall

On and on  
We will fly now & forever  
Side to side now & forever my love

Thousands of miles through the cold stormy air  
There's really nothing that I wouldn't dare  
I climb the eye of the hurricane  
When the winds are whispering your name

On and on  
We will fly now & forever  
Side to side now & forever my love
