

# XXANAXX, Pseudoephedrine

There's nothing inside me  
You haven't already now  
Walk through the shadows with me  
Hold my hand, don't let go  
Don't let go /10x  
I'm gonna take to the place  
Where day ends and night begins  
Different time in outer space  
Where things fell apart like dreams  
I'm gonna be your pseudoephedrine /2x
