

Yellow Tricycle, Yellow Tricycle

Where i'm going where i'm from on my yellow tricycle
The nights i've been looking for a way back home
The things i am going through the fear just to talk to you
The friends i don't understand
And you like a nail in my hand
You dont know the lies that i took for truth
The days running after you
My heart that is beating fast
If only the moment could last
The night that i spent with you you don't remember do you
The pain that'll never end 'cause you're like a nail in my hand
You don't know for you ill make it all blue
My yellow tricycle with your two broken wheels
Around and round and round
My yellow tricycle you make the world all blue
Your voice in my head under the bed
I know they're waiting for me
Out of the window maybe i'll jump
And you will rescue me maybe
My only friend my only
Maybe you will rescue me
