

# You+Me (Pink & City And Colour), Capsized

We've got a long way to go  
We're too hidden  
I can feel it in my bones  
Have we found it?

We were two ships in the night  
Passing by in the pale moonlight and capsized  
We were two ships in the night  
Hellbent on trying to survive and capsized

The moon will shine her light  
Don't find the tides they ride  
Give anything, float around my darling

I can't save you, the current is too strong  
Our madness all along  
Oh wicked cane I am my darling  
And you can't save me

We were two ships in the night  
Passing by in the pale moonlight and capsized  
We were two ships in the night  
Hellbent on trying to survive and capsized

We were two ships in the night  
Passing by in the pale moonlight and capsized  
We were two ships in the night  
Hellbent on trying to survive and capsized
