

16 Volt, Crush

Drown me in this feeling celestial overload
Main line rush right through me
Let it slip inside wash the fear away
Scratch right through what I need
Reasons even I know
Like the moments left behind you
I couldn't help you if I could
Like the places you have been to
You're left reeling from the let down
Tired of this feeling a shadow I can't shake
It courses through me
Burning up inside crush like overdrive
It figures out, what I need
Reasons even I know
Like the moments left behind you
I couldn't help you if I could
Like the places you have been to
You're left reeling from the let down
Crush
Reasons even I know
Like the moments behind you
I couldn't help you if I could
Like the places you have been to
You're left reeling from the let down
