

# 16 Volt, I Fail Truth

this fucking radio doesn't even ever work  
nothing coming through but static from the earth  
there's parts inside that are despised  
I fail truth some things do I fail truth some things do  
I find these things are made with little realised  
I find they fall apart after a few days of life  
their parts divide and get revised  
I fail truth some things do I fail truth some things do  
I fail truth some things do I fail truth some things do
