

1TYM, Let's Set Off (ddonaja)

Hook)

Lets leave far away, lets go, riding with the flowing music

Lets leave together to those white clouds

Verse1)

Saying I didnt want to study, mischievous me,

Being lazy and just a cigarette smoker me,

I dont have any special talents

But I found these new friends

Their name is music

And the closest friend to me is HipHop

Whats that mean?? Dont ask--just listen

Dont listen-- just feel it. You'll know if you just feel it

If you see it, then live it. I live HipHop

I fill your empty cup with music

Not your lips, not your ears, not your smart brain

But drink with your heart

repeat Hook

Verse2)

When Im happy, it makes me happier

When Im sometimes sad, its always right by me

When Im high in spirits, it makes me more excited

When I get lonely, Its always next to me

Yo, a girls heart always changes

Everyone is just a plan to leave you

I just stupidly look up to the sky

The stories going around are so typical

So I'll tell you those typical stories through rap

Now this is my only happiness

This is the gift that the heavens gave to me

Yo, its been 10 years since I walked with music in my hand

Its been 7 years since I left my house, wanting to do music
