

3 Doors Down, Feet In The Water

Please be careful what you say
You might give that little heart away
Just remember everything I give
You might have a little time to live

Just remember everything Ive lost
Truly youll remember everything it cost
Would you pay attention please?
Or make the same mistakes as me

Im getting tired of you never understanding a word that Im trying to say
Because you wont listen to me

Im not going to wade out so far
That I cant stand on my own
You know I like it with my feet in the water
So please dont leave me here alone

Just be careful what you say
You might give that little soul away
Will you throw away these days?
Without ever knowing your name

Im getting tired of you never understanding a word that Im trying to say
Because you wont listen to me

Im not going to wade out so far
That I cant stand on my own
You know I like it with my feet in the water
So please dont leave me here alone

[x4]
I want it
I feel it
I want it
I feel it
I need it more

I wanna watch you wade out so far
That you cant stand on your own
Youre like a child with your feet in the water
And I cant leave you alone

Im not going to wade out so far
That I cant stand on my own
You know I like it with my feet in the water
So please dont leave me here alone

[x4]
I want it
I feel it
I need it more

[x4]
I want it
I feel it
I want it
I feel it
I need it more
