

# 3 Doors Down, I Feel You

They gave me a life that's not so easy to live  
And then they sent me on my way  
I left my love and forgot my dreams  
I lost them along the way  
Those little things you say  
When words mean so much  
You never back down  
And they all shy away  
You always listen to me

And what do I get to get me through these sleepless nights?  
And what do I have to hold when no one's there to hold me tight  
And what do I see? the only thing that gets me through this is what I feel and I feel you

And this ain't no bed of nails  
But there not roses just the same  
Got this road sure can be long  
Another endless day, another seven hundred miles that'll take me further from my home

Those little things you say  
When words mean so much  
You never back down  
And they all shy away  
You always listen to me

And what do I get to get me through these sleepless nights  
And what do I have to hold when no one's there to hold me tight  
And what do I see the only thing that gets me through this is what I feel and I feel you

I know what you're going through now  
Believe me I live this

And what do I care to get me through these sleepless nights  
And what do I have to hold when no one's there to hold me tight  
And what do I see the only thing that gets me through this is what I feel and I feel you
