

# 3 Doors Down, One Light

Standing humble, a fist of rage  
A silent army, they call my name  
See that firmly, and not in dismayed  
I'm never broken, and I'm not afraid

So come with me, let's take this world and make a change  
And we'll give this, more than we can take away  
And we'll see this, through eyes we always thought were blind  
If we could find, just one light to shine  
Just one light to shine

Walls will crumble at our feet  
All we know we will finally see  
We'll fight for hope, and we'll kill this doubt  
Angels of war, let me out

Come with me, let's take this word and make a change  
And we'll give this, more than we can take away  
And we'll see this, through eyes we always thought were blind  
If we could find, just one light to shine  
Just one light to shine

So come with me, let's take this word and make a change  
And we'll give this, more than they can take away  
And we'll see this, through eyes we always thought were blind  
If we could find, just one light to shine  
Just one light to shine
