

# 311, Down Suth

Let me take you down south  
Hear it from the dover's mouth  
The rhythm will make you want to move your body  
I had it once and never ever forgot it  
Feel the rhythm of rhapsody  
Your body moves in raw ecstasy  
Explosive eruption beyond compare, and

Take my advice don't think twice  
Let me take you way down south

Step back 'cause the funk is here and  
The base is kickin' straight to your ear man  
Because it's like that so don't talk back  
And if you do then you're gonna get the back slap  
Down south, that's an enigma  
But to you it's a stupid dumb stigma  
That's right it's outta sight

Let me tell you 'bout my baby  
She loves me, don't mean maybe  
She knows what I think and I don't have to say it  
I love her so I don't have to play it  
We sit and drink in the sun  
I raise my glass and say she's the one  
Cool breeze light squeeze life

Take my advice don't think twice  
Let me take you way down south
