

# 311, Light Years

You're a thousand light years runnin' through my brain  
Reminding me that no one's sane  
Not all the time  
Yes

You're a thousand light years runnin' through my brain  
Reminding me that no one's sane  
Not all the time  
Yes I still remember you  
In a way that you'd want me to  
I man a man you know see  
Who will do right for you

Never let your regret make you wish we had not met  
I cannot think that way yeah  
I drove you crazy I see that plainly  
You waited on pins for me  
But needles never ever love  
What did you think of
