

5 Days Ahead, Remember Me

I remember that smile on your face. you moved
so far away. still I whisper your
name. I sent you a postcard. lyrics to our
favorite songs. you said you never saw
it. and I'm fading farther away from you.

(fading so far away.)

I fly to your satellite sending signals to you. (you're still
too far away.) empty space, you're nowhere to
be found. whatever road I take seems endless. you're
never there. am I gone? will you be there again?
am I gone? I wish in your heart you'd remember me.
