

8 Foot Sativa, Engine...

These things in my life
I've seen dreams in my head
That's can destroy the way things work
I can't take it anymore just take it anyway
All of my life I've been kicked and beaten down
That's how the engine lives sometimes
Now take it away

Caught in these days
Take my life away
caught in these days

No escape from the mad man
That keeps controlling my life
And all the things in my head
I can't take anymore just take it anyway

Always the same deal
More and more that I feel
It shows me what is real
Leave it all behind
So shoot and I'll die

We've got a problem
What is this shit
What is the problem
We're fuckin' you back.
