

# 911, Carefree Lover

Chance allowed us to meet  
But when all is said and done  
It wasn't meant to be  
Although we had such fun  
The recollection of times we shared  
I know our lives have changed  
The memories remain  
My carefree lover

Chorus:

She was a girl I knew back then  
Way back when there were no cares in my world  
She was my friend  
My carefree lover  
It seems we were in love so free  
But nothing never seems the way it used to be before  
There'll be no other  
She will be my one and only carefree lover  
She will be my only one  
We talk the night through until dawn  
Impassioned by our thoughts and spending time alone  
You never would drive home  
Until the birds would sing the morning had arrived  
And how I reminisce the best days of our lives  
My carefree lover  
Repeat Chorus to fade
