

# A Love Ends Suicide, Another Revolution

Many lessons learned  
Take this with everything you've got  
Think twice to change your mind  
Breathe in and open up your eyes  
Revelation is what you've got to fear  
When time takes over revelation  
And we'll end up with the lord  
Feels like a break through it stays here for a while  
The second, everything moves on  
Don't make me stare at the sun to long  
Hope will go blind, we'll be around to stay  
Beyond tonight were set to go  
With nothing left to set us back  
So I'll let you know when I'm there  
These faces try and make me fold  
I'm running out of excuses  
To have the world and just let go  
A second chance to break away  
Another revolution  
A second chance to finally break away  
This is the thanks you get for letting go  
Let's take a step in my ride  
Let's force the push with our eyes  
It's only time before we die  
Another revolution  
A second chance to finally break away  
This is the thanks you get for letting go  
Revelation is what you've got to fear  
When time takes over  
This revelation is what we got to fear  
The day we start to fight this revolution
