

# A Skylit Drive, Heaven

Get me out! Get me out!  
Heaven can't handle you quite like I do  
Stay close I'm your protection  
Get me out! Get me out!  
Let me show you the life  
I will come  
Breathe tonight  
I will come  
I will....  
Whether we live or die just remember I'll be alright on the other side  
Whether we live or die just remember I'll love you forever  
I've been waiting for you  
Let us settle this here  
As you open your eyes  
Oblivion sets in  
The revolution caved in  
Rise! Up on your feet girl  
The world awaits your smile  
Whether we live or die just remember I'll be alright on the other side  
Whether we live or die just remember I'll love you forever  
Did you think you were better off this way?  
Running off with all the things you said to me
