

A*Teens, Closer To Perfection

Closed every door putting everything aside
Hooked on to you and my life was passing by

I stood in a cloud of dust
Blinded till you cut me off

Im back in the light getting over you
Now I got it together
Im stronger than ever
Back on a track with a better view
And Im getting closer to perfection because of you

Gone in a beat suddenly out of my sight
Shook me around like a thunder bolting strike

I stand in the light of faith
I thank you in so many ways

Im back in the light getting over you
Now I got it together
Im stronger than ever
Back on a track with a better view
And Im getting closer to perfection because of you

Closer to perfection cause of you
Closer to perfection cause of you

All the things I wouldn't do without holding on to you
Lost in the dark 'til you left me with a clue
