A*Teens, Singled Out

When I wake up in the mornin' Before I style my hair The first thing on my mind Is I hope he cares And every single evenin' Before I hit my bed My mind analyzes Every word she says It seems like everybody's got someone A hand to hold and a soul to touch I want it all so much I can't get you, I can't get you I can't get you off my mind When I'm with you, I know I could Love you 'til the end of time I can get you, I can get you If you could just tell me how 'Coz with all this love around An' me without you I'm feelin' singled out If I only had the courage To open up my heart Would he run, would he hide? Would he light a spark? Should I walk up to her? Should I throw a charmin' smile? Should I say that her eyes Light up my skies? Seems like everybody's got someone A hand to hold an' a heart to touch I want it all so much I can't get you, I can't get you I can't get you off my mind When I'm with you, I know I could Love you 'til the end of time

I can get you, I can get you If you could just tell me how 'Coz with all this love around An' me without you I'm feelin' singled out Every single day I see these couples walkin' by And if I took a chance Maybe I could be one of them If only I could have you as the one The hand that I could hold, the soul to touch The heart that I control I can't get you, I can't get you I can't get you off my mind I can't get you, I can't get you I can't get you off my mind When I'm with you, I know I could Love you 'til the end of time I can get you, I can get you If you could just tell me how 'Coz with all this love around An' me without you I'm feelin' singled out I can't get you, I can't get you I can't get you off my mind When I'm with you, I know I could Love you 'til the end of time I can get you, I can get you

If you could just tell me how 'Coz with all this love around An' me without you I'm feelin' singled out I'm feelin' singled out
