

Aaron Neville, My Precious Star

(Roberts/Golde)

So many special reasons we are here, so in love
I feel so blessed because I know that we're in this love
You are the sun that lights the sky, you are the only one I need in my life
Cause you are my precious star, wherever you are, I want to be there
And you've got all of my heart, and I will respect this love forever
Yours is the sweetest song I've ever heard, or ever knew
I can't imagine living in this world, without you
I never thought that I could feel something so wonderful, something so real
Cause you are my precious star, wherever you are, I want to be there
And you've got all of my heart, and I will respect this love forever
Nothing is stronger than our love, nothing lasts longer than this love
Nothing is deeper than, sweeter than, loving you
Cause you are my precious star, wherever you are, I want to be there
And you've got all of my heart, and I will respect this love forever
And you are my precious star, wherever you are, I want to be there
And you've got all of my heart
