## Aaron Pritchett, New Frontier

Wake up baby it's time to leave We got plans and we got dreams We got a long way to go Pack up all of your emotions All your faith and devotion We're gonna need it this I know

If you're at the edge of the past Our future's unfolding fast Baby don't look back

We're goin' to a new frontier Wide open without fear I walk this winding road With you into the great unknown We're goin' to a new frontier Let's trust that love will lead us Right where we belong And walk on

And I can't wait to get outta here The wind is up and the path is clear For the first time in my life Our destination don't concern me More and more I'm longing It's the journey It's the ride

Everything is within our grasp When we have the courage to ask And we don't look back Don't look back

We're goin' to a new frontier Wide open without fear I walk this winding road With you into the great unknown We're goin' to a new frontier Let's trust that love will lead us Right where we belong And walk on Walk on

I know there's no confusion Where my heart is movin' I know it's true I know it's true

We're goin' to a new frontier Wide open without fear I walk this winding road With you into the great unknown We're goin' to a new frontier Let's trust that love will lead us Right where we belong And walk on

(To the new frontier) Into the new frontier (We're goin to a new frontier) Wide open without fear (We're goin to a new frontier) I walk this winding road (Wide open without fear) With you into the great unknown (We're goin to a new frontier) The wind is up and the path is clear (We're goin to a new frontier)
