

Aaron Pritchett, Nothin' But Us

I love these days when we stay all locked up in love
Finally find a little time to waste
We talk and laugh while hours pass we can't get close enough
Making memories nothing can erase
Nothing but us no place that we've got to be
Nothing but you, your loving eyes looking back at me
Lock up the door
Unplug the world... it doesn't take much
Nothing but you, nothing but me
Nothing but us
The stress and strain of everyday, we leave it all outside
Get lost in a world that's all our own
Girl, I live for moments when it's just you and I
It's perfect when we're finally alone

Nothing but us no place that we've got to be
Nothing but you and your loving eyes looking back at me
Lock up the door
Unplug the world
It doesn't take much
Nothing but you, nothing but me
Nothing but us
Let's not wait so long to make time for us again
These are memories nothing can erase
CHORUS
