

Abdel Wright, Human Behaviour

Why medication so expensive?
Tough luck, life threatening diseases
Hope I'm not too interrogative
Why if your moneyless that means you can't live?
I'm talking World Health members
Pharmaceutical companies, doctors
Manufacturers of drugs please remember
Humanity the key and not cash numbers
What have we come to?
Let us look into ourselves
We need a rescue
Your conscience can be your hell
Long time you a pressure me, sister
Take it a little easy upon me, brother
Can you ever try to change it, mister
Or is it human behavior?
Long time you a pressure me, sister
Take it a little easy upon me, brother
Can you ever try to change it, mister
Or is it human behavior?
I no really have a problem with tax
But when it gone too high that's whack
Property owners can't relax
Greed is the systems negative attack
Food prices has no limit
Products on shelves are not fixed
They target things that sells quick
Put on a dollar or two that's bullshit
What have we come to?
Let us look into ourselves
We need a rescue
Your conscience can be your hell
Long time you a pressure me, sister
Take it a little easy upon me, brother
Can you ever try to change it, mister
Or is it human behavior?
Long time you a pressure me, sister
Take it a little easy upon me, brother
Can you ever try to change it, mister
Or is it human behavior?
Phone company pretenders
Tricky bill instigators
Deliberate miscalculators
Start making phone with counters
Warning to cellular makers
Toxic materializers
Useless batteries, high numbers
Recycling out the picture
What have we come to?
Let us look into ourselves
We need a rescue
Your conscience can be your hell
Long time you a pressure me, sister
Take it a little easy upon me, brother
Can you ever try to change it, mister
Or is it human behavior?
Long time you a pressure me, sister
Take it a little easy upon me, brother
Can you ever try to change it, mister
Or is it human behavior?
