

# Abdul Paula, Next To You

Abdul Paula  
Forever Your Girl  
Next To You  
When we met  
The sparkle in your eyes  
Showed me that  
We were meant to be  
In love

Sharing our fantasies  
You touched me  
Then we kissed  
I could not believe  
That love was so strong

It didn't take too long  
To learn  
Love will go on and on  
Love's an everlasting bond

When I'm next to you  
Our love flows through  
I can't explain  
What you do

When I'm next to you  
I feel brand new  
I love you for  
All the things you do

Can't deny  
The feelings deep inside  
Our hearts and minds  
Love is alive  
It's true

I'm so into you  
I love you

[Solo]

When I'm next to you  
Our love flows through  
I can't explain  
What you do  
When I'm next to you  
I feel brand new  
I love you for

All the things you do  
You know when I'm all alone  
And you're so far away  
I wish that you were here  
Holding me

And I find myself thinking  
Of how it would be  
Knowing you're with me  
I love the way I feel  
When I look into your eyes

--I love you baby--  
I love the way I feel

When I'm standing by your side  
--And I want you baby; I need you

When I'm next to you  
Our love flows through  
I can't explain  
What you do  
When I'm next to you  
I feel brand new  
I love you for  
All the things you do
