## Abdul Paula, Next To You

Abdul Paula Forever Your Girl Next To You When we met The sparkle in your eyes Showed me that We were meant to be In love

Sharing our fantasies You touched me Then we kissed I could not believe That love was so strong

It didn't take too long To learn Love will go on and on Love's an everlasting bond

When I'm next to you Our love flows through I can't explain What you do

When I'm next to you I feel brand new I love you for All the things you do

Can't deny The feelings deep inside Our hearts and minds Love is alive It's true

I'm so into you I love you

[Solo]

When I'm next to you Our love flows through I can't explain What you do When I'm next to you I feel brand new I love you for

All the things you do You know when I'm all alone And you're so far away I wish that you were here Holding me

And I find myself thinking Of how it would be Knowing you're with me I love the way I feel When I look into your eyes

--I love you baby--I love the way I feel When I'm standing by your side --And I want you baby; I need you

When I'm next to you Our love flows through I can't explain What you do When I'm next to you I feel brand new I love you for All the things you do
